1. Applications:

It is applicable to such test as drying, cure melt, sterilize in industrial and mining enterprises as well as in laboratory and scientific research institute.

2. Features:

1 The working chamber is made of high quality sheet steel or corrosion-resistant stainless steel, safe and easy to use.

2 Intelligent temperature controller is based microprocessor with PID parameters controlling function. Digital display of set and actual temperatures. High temperature controlling accuracy and reliability.

3 Hot air circulation system is consist of low-noisy fan and optimal air duct, reaching a uniform temperature inside the working chamber.

3. Notes: ASI Series has timing function. And the range of timing is 0 to 999min. The temperature stability is $\pm 1^{\circ}\text{C}$ and the temperature accuracy is $\pm 3^{\circ}\text{C}$, RT stands of room temperature.

Except main voltage of model 9623A 9426A and 9626A are 380V,50Hz, the others are 220v,50Hz.
