

ASI-800 Solder Mixing Machine-50265

Specifications:

Model	ASI-800
Dimensions	400*400*480(mm)
Deaeration time	0~90H
Revolution speed	600RPM/Min
Rotation speed	350RPM/Min
Motor	1p AC220V 50/60HZ 40W
Power supply	1p AC220V 50/60HZ
Weight	Approx.48Kg

Features:

- Unique contoured shape, generous appearance and practical, which is made by advanced coating process workmanship.
- Mixing principle is on the basis of Motor rotation and revolution mode of agitation, no need to defrost the paste. Need to recovery the paste in short time, then can be used after stirring well and deforming.
- 500g paste applied to all brands can be mixed with 2 cans one time, which can save time and improve efficiency.
- Closed stirring can fix running time, make sure stability of paste softness, and by stirring old and new paste can make new active paste.
- Paste box no need to be opened during stirring to avoid oxidation and water vapor absorption.
- Products has high degree of automation, with stable performance, easy to operate, high safety factor, simple in maintenance.
- The machine apply to Omron time relay controller, reliable and easy to operate.

ASI-800 Solder Mixing Machine-50265

- ★Counter weight is using when the client just need to mix one bottle of the solder paste.
- ★Dimensions : 500*470*640mm 1pec
- ★Gross weight : 56KGS (with polywood case ,fumigated.)

SMT SOLDER PASTE MIXER (CE)

- Improve the efficient, 1 minute is enough.
- Improve the viscosity 5 times than by manual.
- No shaking, small noise.
